<p>6. Flourishing & Big Picture Reflection</p> <p>What must communities, schools, and families provide so young people can thrive? What does choice look like under systemic constraint? What lesson does this story teach about flourishing?</p>	<p>Your concluding idea (no quotes required unless desired):</p> <p>Part 1 suggests that for young people to truly flourish, communities, schools, and families must work together so no kid like Wes is left alone with adult problems. That means stable housing, safe schools, mental health care, chances to grieve losses, and real job or training pathways that actually feel reachable. In this world, “choice” is never completely free- street culture and systemic barriers narrow the menu of options long before a teenager decides anything. The story warns us not to blame individual choices without asking what supports were- or weren’t- there, and it argues that flourishing depends on building integrated support systems that make better choices realistically possible, not just theoretically available.</p>
